"DAILY" STAFF WAS SPOKEN TO BY CRITIC

Vivid Portrayal of Newspaperman's Life
S. MORGAN-POWELL
Prominent Dramatic Editor of the Montreal Star

The Daily staff had the privilege and pleasure last night of listening to a very inspiring address by Mr. Morgan-Powell, the well known dramatic and literary critic of the Montreal Star. Mr. Morgan-Powell is a journalist of wide experience, having been connected with newspapers in the United States, England and Australia as well as Canada and his talk dealt considerably with the methods employed in these various countries of operating a journalistic business.

In opening his address the speaker pointed out the fallacy that newspaper work is an easy task, something that anyone can go into and become successful without any apparent effort. This idea is prevalent everywhere amongst people who have had no experience in this line of work. This is a mistaken idea however, as Mr. Morgan-Powell was able to show in the course of his remarks.

Although journalism has a great many disadvantages connected with it, to the person who takes it seriously it is a profession which stands on as high a level as any of the professions of high standard. To be successful in journalism one must have a strong constitution as the work is very fatiguing, with no specified hours and when work is apparently finished some new task may spring up which anyone on hand may be required to do. It is brain-racking work, one of the greatest essentials to it being speed.

In pointing out the advantages of being a journalist Mr. Morgan-Powell mentioned as such, the acquirement of self control in the newspaper office, the development of a good disposition is absolutely essential to a successful reporter, he is often in a position where he does not feel that he is receiving the best treatment, but he is obliged to make the best of it. Tact, something which is not a natural gift, is developed to a greater degree in the newspaper business perhaps than in any other business.

Interviewing, is a very interesting occupation, this has a very broadening influence over one in that, all kinds of people are run up against, the ability to judge human nature is therefore developed to a great extent. There is also the element of travel which comes into a reporter's work, although he does not wander very far when only a beginner yet as he progresses he is apt to make journeys to almost any place on the globe.

The greatest essential to a successful journalistic career, said Mr. Morgan-Powell, is the capacity for real work, even though it is apparently not always recognized.

(Continued on Page Four)

MANY NOTABLES TO BE AT ARTS DINNER

Banquet Will be Held at the Union

One of the biggest events of the year will be the Arts faculty annual dinner which will take place in February the eleventh, in the Union.

In previous years the dinner has usually been scheduled about the date at which the final exams take place, but as it falls earlier this year the function will without a doubt be a greater success.

Principal Sir Arthur Currie; Dr. Ira Maskey, newly-appointed acting Dean of the Faculty of Arts; Dr. Gordon Jennings Laing, former Dean who is at present connected with the University of Chicago and many other prominent guests will be present.

As a result of the meeting which the committee in charge held with Mr. Honegger a menu of the highest order has been selected and there is no doubt that a meal of very high quality will be served.

The following is a list of men from whom tickets may be obtained: L. Sczeszlo, Arts '24; A. S. Ross, Arts '1; D. Everett, Arts '25; G. Gorrie, Arts '26; F. M. Gordon, Arts '27; Morton, Arts '27; G. W. Willard, Arts '23; G. Van Valet, Arts '23; W. Hatcher, Diocesan College; A. R. Stone, Wesleyan College; W. P. McPhail, Presbyterian College; E. D. Grailmont, Aurie Laing.

WHAT'S ON

TO-DAY

1.00 p.m.—Dent, '27 hockey practice.
2.30 p.m.—Ski practice.
4.00 p.m.—Arts '26 Basketball practice.
4.00 p.m.—Med. '27 Basketball practice.
5.00 p.m.—Science '25 hockey.
5.00 p.m.—Wrestlers at Strathcona Hall.
5.00 p.m.—City League Baseball practice.
5.00 p.m.—Gymnasium practice at M.H.S. Gym.
5.15 p.m.—Swimming practice at K. of C. Tank.
6.30 p.m.—Med. II vs. Theo. II basketball.
7.15 p.m.—Pharmacy vs. Arts I basketball.

"SPACETIME" DIMENSIONS DEALT WITH

Dr. Silberstein Gives Second
Lecture of Series

ONE MORE

Large Audience in Attendance
at Physics Bldg.

Another crowded audience listened to a remarkable address by Dr. Silberstein yesterday in the Physics Bldg. It was the second of three lectures, the final one being at 5 o'clock today.

Dr. Silberstein explained the mathematics of the "Spacetime" with its three dimensions of space and one of time, employed by Einstein prior to the year 1916 and showed how difficulties arose in connection with the conception of this Spacetime being of infinite extent.

He therefore abandoned this form and adopted a non-Euclidean space in which Elliptical geometry forms the basis of argument and space the volume of space is then finite instead of infinite the previous difficulties were overcome. He further postulated a uniform distribution of matter throughout this finite space. But to satisfy the mathematical equations which result, it is necessary to (Continued on Page Four)

Unprincipled Action

Several incidents have occurred during the recent college year in which students, having no connections with the "Daily", have used the editorial Offices and contents for their private use to the ultimate handcapping of the staff of the paper. The climax was reached yesterday morning when an undergraduate was caught absconding with a copy of the "Daily" stolen from the files. The files are made up and are used by the staff in the pursuit of their duties in editing the paper and are moreover the private property of the "Daily." All students are asked not to deface in any manner the contents of the Editorial offices. The rooms are kept open to permit of their free access and use by all students.

The co-operation of all in this respect is urgently required and anyone deliberately defacing or destroying the records will be summarily dealt with.

DOMINION IS DISCUSSED BY ECONOMISTS

Everett and Gardner Read
Papers

REFRESHMENTS

Doctors Hemmeon, Day and
Fife Were Present

French criticism of Canadian politicians and their policies, with an almost unlimited range and variety of economic and political views marked last night's meeting of the Political Economy Club. "The Economic Situation in Canada, East and West," as outlined by C. D. Everett and W. Gardner, respectively, rapidly broadened into a general discussion of national questions of the day—immigration and emigration, tariffs and railways, the permanence of Confederation, and a host of others.

Mr. Everett in a clear and forcible speech, occupied himself chiefly with Maritime rights, and the effect of Confederation and the National Policy on Maritime trade. Passing over the quarrel between East and West with the reminder that the Prairies owe their development to the older Provinces, the speaker briefly reviewed the history of the Federation movement, and its effect in Nova Scotia and New Brunswick. Industrial growth had followed the adoption of the National Policy, but by no means to the same extent as in Quebec and Ontario. The Maritimes had sacrificed their natural markets in New England, but the I. C. R. intended as compensation for that loss, was being administered in a quite different spirit. The rest of the country must be prepared to make equal sacrifices, and should not expect the Const. Provinces to suffer for the sins of Western railway contractors.

Reciprocity, thought by some to be the saving of the Maritime Provinces, was sharply criticised, on the ground of uncertainty. The Fordney tariff had had a very serious effect; but had it been suddenly sprung on us after a long period of complete dependence on American markets, it would have been disastrous. We had absolutely no guarantee that Reciprocity, once agreed to, could or would be maintained for any length of time.

"It is vain," concluded Mr. Everett, "to place any trust in the political parties. I see no hope either in the Liberals or Conservatives. Our only solution lies in the industry of Canada's citizens, in a better understanding among the various Provinces, and in a Government with a broad, truly national policy."

Mr. Gardner began by attacking the statement that the East made the West. If the East hadn't done it, he observed, "the States would." He painted a graphic picture of depression on the Prairies, indulging in caustic criticism of the optimism prevalent in banking and railway circles. Drought, poor crops, the low price of wheat, inadequate banking and credit (Continued on Page Four)

JUNIOR HOCKEY TEAM RECRUITS

Undeclared Team Assured of
a Reserve of Players

A splendid turn out of candidates for the Junior Hockey team, which held a practice yesterday afternoon at the Mount Royal Arena, came as a response to "Shag's" appeal to eligible men to reinforce the youngest of McGill's hockey societies.

The announcement that promising material is desired to strengthen the defense of the team as well as to assure a reserve of players at all times, had the desired effect of drawing out a coterie of capable men. Upon these the coach concentrated his attention, to whip them into that form where they will constitute an asset to the aggregation which by dint of ability and stamina, so far remains undefeated. The players were put through a very strenuous practice, the regular men remaining on the ice for the full period. The Junior puck chasers in their last encounter blanked Loyola on the latter's rink, and it is confidently expected that the regular squad, supplemented and reinforced by the newcomers, will be successful in the remaining three games, which will assure them a chance at the play off.

The next practice will be held on the Hollow rink on Saturday from 1 to 2 p.m., and the Junior hockey picture will be taken at that time also.

MONTREAL, FRIDAY, FEBRUARY 1, 1924.

THE CHALLENGE

From the age when civilization was first beginning to dawn on the world down to this present era of system, finance, trusts, unions, flappers and morons, there have been some who have acted as guardians of a candle, which burns continually with the hope that some day the social system will enter into a state of perfection. These men and women have expressed this desire in many ways. Some wrote of Utopias, the lands of happiness. Some have spread their beliefs by word of mouth, their oratory stirring the hearts of the people. And some have fought against the forces of might, in spite of the fact that their careers, their very lives, might be the price paid for rashness. In each generation their influence has been felt and though some have entered into the hosts of those who enjoy immortal fame, nearly all in their turn have been derided as dreamers, idlers, revolutionists, rebels, or fit specimens for the homes wherein dwell those charged with mental delinquency. The lot of the searchers for Utopia has never been a pleasant one, for too often they have been outcasts, ostracized by the "nice" people of the earth, who being rather inflexible and stiff, shrink from anything that suggests a change.

To-day the situation is in no way unique from the social system is sadly in need of remodelling, in spite of the ultra-optimistic statements of those who would not benefit by a turn of the wheel. Poverty and vice are yet with us, unwelcome guests in the house of the nations. The imps of malice and hate run unmolested in the world's main street and money can cause justice to wink through her bandage, as she fixes the scales. The dreamers still keep the age-old candle alight, even though it flickers at times, and the long-formed habit of shrinking from a change persists even now in the ranks of the respectably good.

But to-day probably there are a greater number than ever before living in the hope that the dream of the years may come true and they look to the youth of the land to bring the world nearer to perfection than it is at present. "The Dartmouth" sees in the son of the recent British premier, Stanley Baldwin, a striking example of a believer in reform, this college paper saying in conclusion: "The atmosphere of freedom in which we live and study will avail us little if we assume an indifferent attitude toward every question presented to us. 'The Nation' and 'New Republic' may praise us loudly, but unless we graduate men who are willing to fight social evils and champion the cause of justice as strenuously as the son of the British Premier, we shall not have profited by our opportunities. There is room in American public life for the sons of politicians, bankers and corporation lawyers to challenge the methods of their progenitors and blaze a new trail towards the goal of social justice and international good will."

The challenge to youth has rung across the face of the earth and if we have ears to hear, for the love of everything that is good let us hear. This may mean criticisms from our friends, sneers from our acquaintances and vituperation from our enemies. But after all, the search for the best, though it may entail hardships, is preferable to the chase of the mere dollar, with masses scrambling for wealth, power and social position.

GRAD. LUNCHEON AT NOON YESTERDAY

Sir Arthur Currie and Undergraduates Also Present

At noon yesterday the Graduates held the second of the regular series of lunches at the Union which are given the second and fourth Thursdays of every month. There was a generous turnout but not as large as the first. Sir Arthur Currie as well as undergraduates, graduates and faculty were present.

Sir Arthur Currie spoke of the purpose and importance of the organization and hoped that the graduates would turn out in greater numbers. This organization he maintained would be in a position to discuss student and graduate problems and accordingly be a benefit to all concerned.

Jim Rackman, President of the Union House Committee gave a resume of the origin of these Graduate lunches.

These meetings give the undergraduates an excellent opportunity to come in contact with the Graduates and members of the faculty and to mutually gain as a result of this intimacy.

Hey, waiter! There's a piece of steel in this bacon. What's the matter?"

"Dunno. Must be a razor-backed hog."

—Record.

Melody in F—(modern version)
Flirt with them
Fondle them
Fool them
Forget them.

PRACTICE SHOOT WAS HELD BY PISTOL MEN

The first practice of the McGill Revolver and Pistol Club was held in the Machine Gunners' Armoury, Mance St. yesterday night. Much good material was unearthed, several of those present showing themselves to be experts in the handling of small arms.

It is intended to hold a considerable number of practices in the future so as to give all men interested in this form of sport a chance to get in on the game.

Revolvers and pistols are supposed to be the hardest firearms to handle, so the club points out that it will be necessary for all those who desire to attain proficiency in this line to turn out to all the practices.

Whether McGill will enter a revolver team in the intercollegiate competition is not known.

JUDGE LANDIS WILL NOT SPEAK TO-DAY

Judge Hennesaw Mountain Landis, Major League Baseball Commissioner will not speak at McGill this afternoon. The Canadian Club executive was unable to get in touch with him yesterday.

It is understood that the Judge will be in town on February 15, and the Canadian Club expects that the Commissioner will address the students on that date.

"Till bite, what is it?" said one mosquito to another as they landed on a mummy.

NOTICES

Will all persons expecting annual proofs or mounted prints call at the Annual Board-room at 5.00 p.m. (except Sat. or Sun.).
The photograph editor will be on hand with all photographs which have come up from Notman's.

HISTORICAL CLUB

The seventh meeting of the Historical Club will take place on Tuesday evening next, February 5th at eight o'clock at the residence of Hon. Lorne C. Webster, 7 Edgemoor Road, Westmount. Just above the Boulevard. Speakers: J. P. Bethel on "The Puritans in New England", and J. G. Bradley, "The Jesuits in New France". Members are asked to arrive on time as an early start will be made in order to allow more time for discussion.

MEDICAL SOCIETY

Sir Arthur Currie will address the Medical Undergraduates' Society meeting on Monday Feb. 4th, at 8.15 p.m. on the subject "Some of Canada's Needs". Refreshments will be served.

MEDICAL CORPS TRAINING

A class for training in the first-aid and Ambulance work has been commenced by Major Pavey, D.S.O., C. A.M.C. It is open to medical students of this University, and owing to the date of commencement being in the middle of the session, entry this year is limited to men who have been already returned once as efficient. The medical training commences at once. Medical students who wish to take this training should attend at Craig Street Drill Hall, on Monday, 4th February, at 8 p.m. report to Major Pavey.

SCHEDULE FRESHMAN-SOPH BASKETBALL LEAGUE

Fri Feb 1

6.30—Med II vs. Theo II.

7.15—Pham I vs. Arts I.

Mon Feb 2

6.30—Med II vs. Arts II.

PHOTOGRAPHS

The Annual Board have the following photographs waiting to be called for:

Mounted Prints

Golf Club.
Gymnastic Club.
Ski and Snowshoe Club.

Will the persons who are responsible for these photographs please call for them at the Annual Board Room in the Union at 5.00 p.m.

Men not turning out for basketball practices regularly will be dropped from teams. This applies particularly to the "B" and Junior Squads.

CITY & DISTRICT HOCKEY LEAGUE

Feb. 7—St. Lambert vs. McGill.

Feb. 21—McGill vs. St. Annes.

Feb. 28—McGill vs. M.A.A.A.

March 6—McGill vs. Shamrocks.

ANNUAL WRITE-UPS

All write-ups for the Annual should be immediately. The managers of all teams, secretaries and scribes of clubs are responsible for these write-ups and should get them into the hands of the Annual Board, immediately.

INTERFRATERNITY HOCKEY
Credit for hockey will be given in the Department of Physical Education for students playing in interfraternity hockey upon certification of the Manager. Hockey attendance sheets may be obtained from the Secretary at Molson Hall.

NOTICE

City League Indoor Baseball team practice will be held to-night at 6 o'clock at the M. H. S. gym.

UNION CAFETERIA

As an experiment the Cafeteria will be open all this week (till midnight). If this innovation is successful the service will be continued.

NOTICE

A meeting of the Macabean Circle will be held on Sunday afternoon, February 3, at 2.30 p.m. at the Union. Rabbi Berger, M. A., will deliver an address on "The Contents of Judaism" and M. Frank, Law '24 will give a paper on "The Prophets." A musical item will also form part of the programme. All students are invited to attend.

ROWING PRACTICE.

Mr. Murray will be in charge of the Rowing practices at the M. A. A.A. on each Tuesday, Wednesday and Thursday at 5 o'clock. Membership forms may be obtained from him.

ARTILLERY TRAINING

Students of this University who wish to take up artillery training, (signalling, range-finding, spotting etc.) should attend at Craig Street Drill Hall on Monday, 4th February, at 8 p.m. and report to Lieut R. E. Findlay.

RIFLE CLUB

A spoon shoot will be held on Saturday at the Montreal High School range.

The first C. I. R. A. 303 gallery competition will take place at the Grenadier Guards range on Tuesday next at 7 p.m.

SKI CLUB

Ski Club would like as many men as possible out at the Cote des Neiges ski hill to-day to help put it in condition before the trial starts at 2.30 p.m. A chance to help the college and see some good jumping free of charge as well.

BOXING CLUB

There will be a practice tomorrow, Saturday in Molson's Hall from 3 p.m. till 5 p.m.

ARTS '26

Every man concerned with the success of the Arts '26 Basketball team in the Fresh-Soph. League is requested to turn out at four o'clock to-night. Two teams at least are wanted. Molson's Hall.

COLUMBIA CLUB

The regular monthly meeting of the club will be held on Sunday Feb. 3rd, at 3 p.m. in the club rooms. All up Columbians.

MED. '27 BASKETBALL

The following men are urged to turn out for practice today at 4 p.m. in Molson's Hall—Snow, Robertson, Rapkin, Tanzman, Rafolovitch, Rubin, and all wishing to try for the team.

WRESTLERS

There will be a practice today at 5.00 p.m. at Strathcona Hall. An entry list will be posted today and Saturday, and all men intending to wrestle in the college Eliminations should sign before Saturday night. This is important as the Eliminations take place next week. All men wrestling outside the college should be sure to get permissions before doing so. This may be done through the club manager.

PHILOSOPHICAL SOCIETY
This society will meet at 8.15 p.m. on Tuesday Feb. 6th, in Strathcona Hall. Mr. W. S. Holloway will address the meeting on "Personal Ideals". All those interested are cordially invited to attend.

MECHANICAL CLUB

There will probably be a trip to the Dominion Engineering Works on Saturday afternoon Feb. 2nd. See this column tomorrow.

SWIMMING AND POLO

Will the following men turn out to-night at the K. of C. tank at 5.15 p.m.—Ross, Veruot, Chairholm, Bourne, Bethel, Jardine, Anson, Forryth, Hughes, Moore, Vlekerson, Kyle, Alexander, Murphy, McLaren, P. Hughes, Astwood, Baker, Phillips and all others interested.

HOCKEY

Hockey practice at one p.m., Dents. '27 at the Hollow rink to-day.

PSYCHOLOGICAL SOCIETY
The next meeting of the Psychological Society, which is to be held in the Convocation Hall of the R.V.C. on the evening of Friday, Feb. 8, will be addressed by Prof. McDougall of Harvard.

CITY LEAGUE INDOOR BASEBALL
Baseball practice tonight at 5 p.m. at M.H.S. Will everybody who intends to play please turn out as there are only two practices before the schedule starts. The first game is on Feb. 7th, and the last is March 7th, each team playing six games in all.

INTER-FACULTY INDOOR BASEBALL
Will each faculty see that they have a representative chosen and a team picked as the inter-faculty schedule will start shortly.

SNOWSHOERS

The Snowshoers cross-country race is postponed until Monday afternoon at 3 p.m. from the Stadium.

SCIENCE '25 HOCKEY

Will the following men please turn out at 5 p.m. to-day for the game with Arts '25: Gill, Ray, Fairbanks.

RECOGNITION OF RUSSIA IN DISCUSSION

Talk on Admitting Soviets to Family of Nations STUDENTS' LEAGUE

Almost Unanimous in Favor of Recognition

That Russia should be recognized as a nation was fairly well argued upon by the Students' League political group which met last night in Strathcona Hall. Bert Wells who read a paper on the subject, gave a fine exposition, bringing up every argument and discussing them.

Wells dealt with the subject not from the particular point of view of Canada, alone, but from the general international aspect. He just illustrated how the fall of the Czarist regime was inevitable, quoting several authorities on the matter, including Woodrow Wilson. A. G. Gardiner has said: "I do not like that government (Sovietism), neither did I like Czarism—but it is not our business to speculate to other how to govern since we did not allow them to dictate to us." Wells went on to attack the Allies for supporting Kolchak and Wrangel who led hordes of freebooting adventurers against the Russians when they were fighting for their liberty. Great Britain, France and the United States had all, at one time or other, had revolutions for freedom and justice; and now Russia had done likewise.

Wells claimed that the chief cause for the non-recognition of Russia was a psychological one. People are afraid of the invading hordes of communism. This would imply that there was something wrong with the present system which could not be a comparison; but this was not so, the speaker believed, for changes in Canada would not come by revolution but by evolution.

The propaganda argument seemed ridiculous. As Lloyd-George has put it, anti-British propaganda has been emanating from Russia since 1904. The old regime had caused much anti-British feeling in the east. Between the Czarist regime and the Bolshevik, there is little difference in foreign policy.

The speaker mentioned the recent correspondence between the Soviets and the United States. Following President Coolidge's message to Congress, Russia was led to believe that a settlement could be made. Accordingly, the Foreign Minister, Tchitcherlin, informed the Americans that "the Soviet Government is fully prepared to negotiate with a view toward its (the claims of the U. S.) satisfactory settlement." Secretary Hughes, however, refused to have anything to do with Russia, maintaining that she had flooded the United States with communist propaganda. The letters shown as proof have later turned out as probably false and the concoctions of someone connected with the Department of Justice.

Russia has been severely criticized by Hyman, Gordon, Conrad, Bourne, Norris, Ross, McDiamid.

GYMNASIUM PRACTICE

There will be a practice at the High Gym. at 5.00 p.m. tonight. All are asked to be present.

S. E. McKyes,

Give the Union Tucke Shoppe a trial and you will come again. And it's MCGILL'S OWN

RED AND WHITE DROP CLOSE GAME TO SHAMROCKS AFTER EXCITING OVERTIME RALLY

Score 2-1—First Loss in Four Starts for McGill Sextette
Penalties Numerous on Both Sides—Longevin
Scores Winning Goal After Nine Minutes Overtime
Pinhey Features Game With Brilliant Stickhand-
ling—McGill Combination Greatly Improved

Last night at the Victoria Rink, the Senior Hockey squad dropped a closely fought game to Shamrocks in a City League fixture, after ten minutes overtime by the score of 2-1.

From a spectator's view point, the game was exciting but the brand of hockey displayed was not particularly brilliant, both teams paying more attention to the man than to the puck. Shamrocks were the worst offenders in this respect, carrying their sticks high all during the play and using their bodies as often as possible.

Referee Don Smith had the players well in hand however, and distributed penalties impartially.

The Red and White players overshadowed their opponents in combination plays and time after time broke through the defense only to miss a pass or to be foiled by Mulcair, who played a good game in goal. Shamrocks relied on individual efforts and long shots from outside the defense, little attempt being made at combination.

After two minutes of play, B. Snyder scored from a mix-up in front of the McGill net and Reid had no chance to save. For the rest of the period both teams went at it with a will and bodychecks were hard and plentiful. At one time McGerrigle skated right in on Mulcair who saved brilliantly. For the remainder of the first session play saw-sawed up and down the ice with McGill playing brilliant combination, but being unable to break into the scoring column, while Shamrocks continued their policy of shooting from way out.

It was not until ten minutes and thirty seconds had elapsed in the second period that Dempsey batted in a loose puck from a scramble in front of the Shamrocks net after a pretty piece of combination work with McGerrigle. Strenuous play continued and Shink was given a well deserved penalty for slugging. Neither side was able to break the tie and the second period ended one all.

In the third session McGill outplayed their opponents and right at the start it looked as if the Red and White would score. Shots were rained on Mulcair from all angles and

he frequently had to go down on his knees to save and had some close calls. Shamrocks were making some pretty individual rushes but found the McGill defense too strong for them. A good many penalties were handed out for tripping and cross checking and when playing a man short, the green shirts persisted in stalling and the Red and White forwards were forced to go behind their opponents' net to get the puck into play. When the final gong rang, the score was still tied with both teams going strong.

Pinhey, who is a recruit from the Intermediates was playing a brilliant game at centre, his stickhandling being a feature of the evening.

In the overtime period McGill lost some splendid chances to score when they were playing six men against four. Shamrocks adopted a four man offensive leaving the goaler unguarded, but despite all this the McGill forwards were unable to break away.

With one minute to go Longevin slipped one past Reid for what proved to be the winning counter and although McGill sent every man up to the attack, they were unable to tally and the bell rang with Shamrocks on the long end of a 2-1 score.

The line-up:

Shamrocks	Goal	McGill
Mulcair	Goal	Reid
Musgrove	Defense	McGerrigle
Longevin	Defense	McMahon
B. Snyder	Centre	Bell
Shink	Forwards	O'Donnell
C. Snyder	Forwards	Wyse
Ryan	Subs.	Pinhey
Dale	Subs.	Dempsey
		Glennie
Referee, Don Smith.		
Summary		
First Period		
1. Shamrocks—B. Snyder, 2.30		
Second Period		
2. McGill—Dempsey, 10.30		
Third Period		
No score.		
First Overtime		
3. Shamrocks—Longevin, 9.00		

PAPERS WERE READ TO THE MECHANICALS

Three Professors Present at Meeting

LAST NIGHT

Smokes and Refreshments Were Served

Last night a very successful meeting of the Mechanical Club was held in the Engineering Building. Three papers were read by members of the club, and at the conclusion of the meeting refreshments and smokes were served.

Prof. C. M. McKergow and Prof. A. R. Roberts and Mr. C. U. Vesol of the Mechanical Department were present, and there were also two or three visitors.

The meeting was opened by Mr. D. A. Gauthier, Sci. '25 who spoke on "Four-wheel Brakes". By means of an ingenious model of an automobile he demonstrated that the wheels that are locked tend to lead. This is why a skid of the front wheels is less dangerous than a skid of the rear wheels. When a car provided with brakes on the rear wheels is stopped suddenly it always tends to turn completely round; whereas a car provided only with front wheel brakes has no tendency. Mr. Gauthier also showed theoretically and demonstrated by experiment that front wheel brakes are more efficient than rear wheel brakes. The reason for this is that, because the centre of gravity of the car is raised above the height of the axles, when the speed of the car is checked the pressure of the front wheels on the road increases while the rear wheels tend to lift. This means that during the time that the speed of the car is being checked by the brakes the front wheels of the car have a greater grip on the road than the rear wheels have because of mechanical difficulties, rear wheel brakes were introduced before the more effective front wheel brakes could be developed. Mr. Gauthier then outlined the mechanical difficulties in the construction of front wheel brakes, and explained by means of numerous diagrammatic slides how these difficulties were being overcome. Throughout the paper he contrasted the mechanically operated systems of brakes with the hydraulic systems. The latter give a more uniform effect on the two wheels, but have the grave

disadvantage of allowing a certain amount of "lag" between the movement of the control lever and the effective action of the brakes.

The next paper was by Mr. A. C. Archer, Sci. '24, on "The Manufacture of Raw Sugar". Mr. Archer contrasted the old fashioned mills one for bad plantation in use before the war, with the present system of one modern central mill for a group of six or seven estates. The old mills were built on a hill or cliff, and the one set of rolls for crushing the juice out of the cane were operated by a wind mill relying on the steady trade winds. The cane juice was conveyed through an underground conduit to the boiling house situated at a lower level, where it was treated with lime, "brought to state" by boiling, the sugar and finally crystallized out in an oscillator.

In the modern mills the cane is brought to the rolls, of which there are fourteen, by a belt conveyor. The first set of rolls is deeply notched so as to cut the stalks of cane into eighteen inch lengths, which pass through two sets of six pairs of rolls. The first set of rolls extract 80 per cent. of the juice, and by the addition of water, the second set is able to extract the remainder of the juice to the extent of a total of 96 or 98 per cent.

This juice is clarified, treated with lime to prevent souring, and passed into two kettles, the first heated by exhaust steam and the second by live steam. The juice thus concentrated is "cracked" in a pan connected with a vacuum pump, and stored in a tank where it is again limed. This liquor is strained through cloth filters, and concentrated by being passed through a series of three kettles. In these kettles heat is conserved by boiling the liquor under diminishing vacua by the heat of the gasses coming off from the previous kettle. The liquor now ready to be concentrated in a vacuum pan having a bottom constructed like that of a cupola melting iron, so that when the crystals have formed to the desired size the whole batch can be "dropped". The batch passes into centrifugals which throw off the molasses from the crystals of sugar, which are finally dried by passing dry live steam through the centrifugal.

This raw sugar is then ready to be shipped to the refineries. Before closing Mr. Archer outlined the process of manufacturing rum, which is a byproduct of the raw sugar industry. A suitable yeast is added to a wash of molasses in order to form a fungus, which desintegrates the sugar into about 80 percent alcohol. A small proportion of sulphuric acid is added, and the mixture is distilled twice. The liquid produced by the first distillation is colourless, and is a set of slides,

JUNIORS WIN LAURELS IN WORDY BATTLE

Defeat Freshettes on Final Inter-year Debate

READING VS. TRAVEL

Victory Scores a Point for R.V.C. Banner

Third year was victorious yesterday afternoon in the final inter-class debate held in the R. V. C. Common Room by the Delta Sigma Society. This victory gains for the Juniors one point towards the banner. The subject debated on was "Resolved that reading is of more educational value than travel." Miss Hasley and Miss McSpornan of first year upheld the affirmative while Miss Gurd and Miss England of third year upheld the negative. The judges, Miss Derrick, Miss Brittain and Dr. Thompson gave a unanimous decision in favour of the debaters on the negative side.

Miss Hasley the leader of the affirmative opened the debate. She declared that the foundations of education are built on reading. The study of mathematics and the sciences depends upon the books alone. A person could travel all his life without learning a word about these.

Travelling helps in the study of history but a knowledge of historical background gained from books is necessary before the knowledge gained by travelling can be properly understood. Literature opens up to us the heart of man. The power of translating into words the soul of man is possessed by only a few. "A good book is the life blood of a master spirit."

Books annihilate time and space. Through them it is possible to explore and learn of places and people as they were long ago. Unclassified knowledge is useless for practical purposes. A traveller whose education has been gained by travel alone possesses a jumble of disjointed facts that are of very little use to him. Voltaire says "Books are made from books." All great writers have been omnivorous readers.

Miss England was the first speaker for the negative. She repeated the statement that reading is the basis of education. During the first six years of a child's life education consists wholly of observation and it is then that the foundations of education are laid down.

Johnson says "The use of travel is to regulate the imagination by reality." Imagination stimulated by reading is apt to get away from reality. Many sciences can be studied better by travelling than in any other way. Chief among these are: architecture, archaeology, geology, anthropology, botany and zoology.

Latin and Greek are dead languages and most people find them very difficult to learn. As they are no longer spoken they are learned by the method of reading. On the other hand we find the living languages French etc. They are learned by the natural method travelling is the country where the language is spoken and by mingling with the people who use it. Such a language is much more easily mastered.

It is the experience that really makes up an education. Tennyson says "I am a part of all that I have met." The world belongs to him who has seen it.

Miss McSpornan was the third speaker. She emphasized the fact that in exploring the realm of books a reader is forced to think. Many sides of a question are presented to him and he must discriminate between the logical and the illogical.

She traced the travels of Mr. and Mrs. Johnson in France. This worthy couple were being educated purely by travel and they returned home as poorly educated as when they left. If they had read before travelling they would have returned home more intelligent citizens and more ready to cope with the affairs of the world.

Miss Gurd concluded the argument on the negative side. Reading is the realm of thought but travel is the realm of humanity. She called attention to the fact that the best educated nations are those that travel. China is an example of a country that advanced through scholarship alone. She built a wall around herself to keep foreigners out and natives in. She advanced to a certain point and there education ceased. It is only since she has begun to open her doors again that progress has recommenced. Essential education comes from experience. Experience comes from observation and change of environment. Human life and experience

coloured by the addition of brown sugar.

The product of the second distillation contains a high percentage of fuzil oil, and in consequence, is so dangerous in its effects that the law allows it to be sold only to authorised vendors.

Mr. E. W. R. Butler, Sci. '21 spoke on Bailey Motors. Through the courtesy of the Canadian Branch of the Bailey Motor Company he was able to illustrate his paper with a complete set of slides.

C.O.T.C. ORDERS

McGILL CONTINGENT C.O.T.C.
Orders by
LT.-COL. R. R. THOMPSON, M.C.,
Commanding Officer

Duties

Orderly Officer: Lieut. G. A. Grier;
next of duty, Lieut. R. E. Findlay.
Orderly Sergeant: LCpl. W. S. Yule; next of duty, Cpl. R. Tennant.

Parades

Contingent Parade: There will be a Contingent parade on Monday, February 4th, in the Craig Street Drill Hall, from 8 to 10 p.m.

Musketry

Monday, February 4th, at Craig St. the following will parade from 6 to 8 p.m. at the Craig Street Armoury.
Monday, February 4, for the purpose of shooting their classification.

Lieut. G. A. Grier, LCpl. W. S. Yule, Cadets Dubutic, Swartz, H. M. Furels, Kingston, P. T., Milligan, J. A., Ridgewell.

Wednesday, February 6th, from 4.30 to 6 p.m. at R.H.C. The following will parade from 4.30 to 6 p.m. at the R.H.C. Armouries. Wednesday, February 6th, for the purpose of shooting their classification.

Lieut. Bagg, Lieut. Melton, Cpl. Watson, Cadets Wynn, Whitehead, Woodley, Winter.

Thursday, February 7th, from 4.30 to 6 p.m. at M.G. Armoury. The following will parade from 4.30 to 6 p.m. at the M.G. Armoury on Thursday, February 7th, for the purpose of shooting their classification.

Capt. McGoun, B.Q.M.S. Manville, Cadets Villard, Thompson, Thomas, Shaw, Pretty, Schor.

Medical Corps Training

This unit has received permission to train men for commissions in the Canadian Army Medical Corps.

The training will be under Major H. L. Parvey, D.S.O., C.A.M.C. The course will be open to the Medical students of this University and will be in First Aid and Ambulance work, instruction in which will commence on Monday, February 4th. Recruiting will close on Monday February 4th.

The Orderly Room will be open on Friday from 5 to 6 p.m. for those who wish to sign on for this course.

Lectures

All Candidates. There will be a lecture in Room No. 33 of the Engineering Building, Tuesday, February 5th, at 5.15 p.m. on "Musketry" by C.S.M. Clarke.

There will be a lecture on Thursday, February 7th, by Major W. V. Howard, on "Organization of the General and Administrative Staffs, and the Composition of a Division."

C. O. T. C. Examinations

The practical examinations for "A" and "B" Certificates will be held on February 21st from 8 to 10 p.m., and February 23rd from 2 to 5 p.m.

Syllabus of Training

8-8.10, Candidates and all others, Inspection; 8.10-8.30, Candidates, Voice Culture, all others, Musketry; 8.40-9.10, Candidates and all others, Platoon Drill, 9.20-9.50, Candidates, Arm Drill; all others, Company Drill. G. M. HYDE (Lieut.) for Adjutant.

McGill Contingent, C.O.T.C.

Knowledge is the realm of Knowledge.

A pioneer must be a traveller before he is a reader. Pioneers have opened up new countries and done much for humanity.

Miss Hasley in a five minute rebuttal refuted many of the statements of her opponents.

The judges in giving their decision congratulated both sides and especially the first year in arriving at the final inter-class debate.

Miss Garig: "Who is your favorite poet?"

Fresh: "My dad. He writes all my checks."

FISTS, FALLS & FOILS

The B. W. and F. championships are going to be held on February 8th and 9th. Judging from the way the men are working out, there is sure to be some keen fighting and heavy slugging, when they step into the ring next week.

Queen's and Varsity have already chosen their college champions, and are settling down to hard training for the intercollegiate meet which is to be held this year in Montreal.

Last night at Molson Hall, the McGill boxers put in two hours steady training. Last year many of the men were out of condition and Coach Robinson is taking care that the same mistake is not made this year.

"Art" Kellner is showing up remarkably well. His two brothers were prominent amateur boxers two years ago, and he is showing that it still runs in the family. He is clever and is a contender for the featherweight title.

Green and Brain mixed it furiously for three rounds. These two will be well worth seeing when the college championships come off.

Among the heavier men, Abinovitch, Apter, and Hart were outstanding.

Coach Robinson is working the men at top speed and in order not to let up during the week end has secured Molson Hall for Saturday afternoon from 3 to 5 o'clock. All the boxers that have been turning out are asked especially to be present as well as all others who are interested.

To prepare for the college fencing championships a series of preliminary bouts are now being held. The number of contestants has been limited to only a handful for if all were allowed to enter, the results would be delayed a great deal. The first bout was held yesterday afternoon in Strathcona Hall in which Knece defeated Pangman in a hotly contested bout. The score was 5-4.

The following must be present Saturday afternoon about 3.30 to work out and take part in bouts. Knece, White, Doushkes, Roncarelli, Crestohl and Silverstone. The bouts must be completed as soon as possible.

able, very little time is left before the coming of the college championships in fencing.

"Are you a messenger boy?" asked the near-sighted man of a boy in the street.

"No, Sir," was the indignant reply. "It's my sore toe that makes me walk so slowly."—Exchange.

Prof: "What is space?"
Student: "I cannot think of it just now, but I have it in my head."
U. S. C.

Commencement to me seems very queer.
Its meaning is beginning.
Even though, in our college career,
It come right at the ending.

Dumb: "What college are you from?"

Bell: "From the College of Hard Knocks, whose colors are black and blue and whose college yell is 'Ouch!'"

R.V.C. DEFEAT MacDONALD IN FAST GAME

First Hockey Match of Series Played

SCORE 1-0

Carol Robertson Plays Sensational Game

The first game of the Montreal Amateur Ladies' Hockey League played between R.V.C. and Macdonald at Ste. Annes yesterday afternoon resulted in a win for the R.V.C. by a score of 1-0.

D. Hutchison had a shot on goal from the face off. Carol Robertson rushed but was blocked at the defence. Play steadied down and both teams combined well but failed to score. The period ended 0-0.

At the beginning of the next period it had become apparent that the teams were well matched and that it would be a hard fight to the end.

Frances Stockings tried a rush and shot but the Macdonald goaler saved. She carried the puck up the ice several times but failed to score.

The third period opened with still no score for either team. Carol Robertson, R.V.C. defense, secured the puck and, making a splendid dash up the ice tried a long shot from the boards. This was saved, but, coming in fast from the rebound Carol snapped it into the nets for the first goal. The R.V.C. team, greatly encouraged, appeared to take on new life and centred the remainder of play at their opponents' goal. Several more shots were made but without success. During the entire match the fast skating of T. Hamilton and the good defense work of A. Paige and E. Bull proved the greatest menace to the R.V.C. team.

The line-up was as follows:

R.V.C.		MacDonald	
Centre		E. Copland	
Wings			
D. Hutchison		I. Hamilton	
R. Grant		J. Delahay	
Defence			
L. Bingham		J. Bull	
C. Robertson		A. Paige	
Goal			
E. Basken		J. MacLeod	
Subs.			
E. Hutchison		D. Sangster	
R. Turley		A. B. Beamish	
M. Burland			
Referee, D. Puddicombe.			

"DAILY" STAFF WAS SPOKEN TO BY CRITIC

(Continued from Page One)

From a financial point of view newspaper work and in fact nearly all branches of journalism do not offer very great advantages. The remuneration in this country is entirely inadequate, this is due to the fact that too many people enter the field without the intention of following it up, they therefore hinder the progress of those who are following it up. The speaker gave a few estimates of the incomes derived by journalists of various degrees of proficiency and responsibility which went to show that those who endeavour to get somewhere are as a rule quite well rewarded. Those who do obtain the most pecuniary benefit are specialists in various one branch of the work, these people can command practically what the newspaper they are working for considers them to be worth. To give one instance of a specialist's remuneration, Mr. Morgan-Powell stated that Bud Fisher who started at ten dollars a week made two hundred and eighty thousand dollars last year. The lack of competition in this country prevents any such remuneration as that.

There are pecuniary advantages common to all newspapermen, said the speaker, for instance, in this country newspapermen, their wives and family are allowed to travel free of charge, this privilege has been taken away in the United States because of its great abuse.

Practically all their entertainment is provided gratis, reporter's passes can generally be obtained for any theatre performance. Besides this a journalist who is any good at all can obtain outside work in the form of writing advertisements for stores, etc. Very often they can obtain more this way than by their regular occupation.

In dealing with the methods of making write-ups, the speaker said that in the United States, practically the whole story is told in brief in the headings and is enlarged upon below, as is done because the average American is always in such a hurry that he will not take time to read a whole article. This is not the case in England where the people are used to taking their time with everything.

Generally speaking Mr. Morgan-Powell does not recommend journalism as a profession for women, although in many branches they can be very successful. As for the use of shorthand in reporting it is not absolutely essential but is often very handy to have it. As a matter of fact the majority of reporters do not know shorthand.

Before closing, the speaker offered to answer any questions which might be put to him. Howard O'Hagan,

LETTER SENT TO DR. WM. PETERSON

Meiji University Writes to Late Principal

Addressed to Dr. William Peterson, there came a few days ago to the principal's office, a letter from Meiji University of Japan. The news of the death of Dr. Peterson had evidently not reached that country. The letter explained in great detail that the University had neither buildings to study in nor any books. All were destroyed in the fire that followed the recent disastrous earthquake.

The receipt of a letter addressed to the late principal of the University caused considerable stir in the administration building and after the first spasm of surprise had quieted down the letter was read and turned over to Dr. Lomer the librarian.

At the same time a letter was also received from the Tokio Imperial University which is also in dire straits. The fire likewise destroyed their means of study.

The letter from Meiji after giving a vivid description of the college in part, "The Meiji University is one of the oldest and largest academic as it was before the earthquake, says institutions of Japan, having been founded in 1881. The university consists of collegiate departments as well as the University proper." There are nearly nine thousand students in this university.

Within a short time there will be erected temporary quarters. There followed an explanation which pointed out that the appeal is not made from a selfish but from a humanistic motive; that it was not mere begging but for the sake of culture and education.

In the advice of Sir Arthur, the Redpath Library has sent a large supply of books of various natures to both Universities.

To the Tokio Imperial University there were sent books on philosophy, literature, history, jurisprudence, political and kindred sciences, while to the Meiji University were sent volumes on chemistry, civil and mechanical engineering and other scientific subjects.

A total of nearly seven hundred thousand volumes was lost in the Tokio conflagration. McGill has given her promise to do all in her power to keep the academic torch burning.

BASKETMEN PLAY VARSITY SATURDAY

Game Will Decide McGill's Chances for Champ.

If McGill beats the Varsity basketball team at Toronto this Saturday she will be in the running for the championship. Toronto has already two wins to her credit and a third one will give her first place.

Earlier in the week the Red and White defeated the North Branch Y. M. C. A. by a narrow margin. The men showed fairly good condition. The last practice before the crucial game was held yesterday afternoon. Coach Van Wagner put the men through a stiff workout, bringing them up to condition for Saturday's contest.

Though the Toronto team has won the two opening fixtures, it is not looked upon as a championship aggregation. The McGill men have shown steady improvement since the beginning of the season, and though the loss of Amaron is still keenly felt, the men are now working well together. Saturday's game is expected to provide plenty of excitement.

Coach Van Wagner refused to announce the personnel of team, saying that it would not be chosen until it goes on the floor. Nine men will make the trip. The forward line will be chosen from Mendelssohn, Little and James; Manson or Brown will be at centre while Quackenbush Hilton and Blumenstein will travel as defense men.

RECENT APPOINTMENTS

Some recent appointments to the various chairs of the Faculty of Medicine are: Dr. Slater Lewis to be Associate Professor of Pharmacology; Dr. Eberts to be Professor of Surgery; Dr. Bazin to be Associate Professor of Surgery.

"Why didn't you arrest that motorist? He was making 60."

"He said his house was afire," replied the village constable. "But I didn't recollect till the burned boob was out of my sight that he doesn't live here."

Inquisitive Neighbor: "Mrs. Smith, your twin boys are so much alike, how can you tell Johnny from Tommy?" Mrs. Smith: "Well, you see, it's this way: I put my finger in Johnny's mouth and if he bites, I know it's Tommy."—Exchange.

president of the Daily then thanked him on behalf of those present for his kindness in coming to address the staff. Refreshments were served before the meeting broke up.

M.S.P.E.; PROVE ABILITY AS BASKETEERS

Defeat R.V.C. in Two Games

LEAGUE MATCHES

Victories Due to Splendid Combination Play

Yesterday's basketball games between the R.V.C. and the M.S.P.E. were undoubtedly the best games that have been played so far in the City Women's League. Both the M.S.P.E. first and second teams were victorious, winning the games with a score of 32-22 and 26-16, respectively. The matches were played in the afternoon in the girls' gym in the Montreal High School and were witnessed by a large and enthusiastic gallery. The play during both matches was fast and never lagged throughout. Though the M.S.P.E. undoubtedly had the better teams, the R.V.C. put up an excellent fight.

The M.S.P.E. teams were far faster than their opponents. Their combination and jumping were excellent, while they seemed absolutely untrifling. Confidence and alertness had much to do with their success. Though frequent fouls were made, the general play of the M.S.P.E. was very good and both their teams superior to those of last year.

In the first team the forwards, Nan McTaggart and H. Tatlow, played outstanding games. Their shooting was most reliable and spectacular, both making frequent field shots and their combination play was splendid. Dorothy Russel and Z. Slack are very reliable acquisitions to the M.S.P.E. team this year. Both are former R.V.C. basketball stars, and have played for four years on the same basketball team, including last year's intercollegiate champion six.

In the match yesterday, they played with all their former efficiency and in excellent co-operation. F. Perry and Madeleine Pulkinghorn also played very good games and the whole team individually and collectively made an excellent showing.

The R.V.C. team played a very good game and fought well throughout. They were only defeated after a strenuous and hard struggle. Though there was no spectacular individual play, the whole team worked well together, their combination frequently proving very formidable. The game served to point out a few weak points in the R.V.C. play which will be improved before the intercollegiate games at the end of the month; and in this way the match was of great value to the College team.

First Game

From the toss-up Nan McTaggart scored the first goal of the game. The ball was then carried up and down the floor until a double foul was made. In the resulting free shots Nan McTaggart scored a point for her team as did E. Russel for her's, this making the score 3-1 in favour of the M.S.P.E. This was followed by four more points for the Physical Eds. scored by N. McTaggart.

H. Tatlow scored the next goal for M.S.P.E. after which six more points were added to their total. The R.V.C. team kept the ball at their end of the floor for some time during which B. Wardwell scored four points for the R.V.C. the score thus standing 15-5. Zerada Slack showed up splendidly bringing the ball repeatedly to their end of the floor where it was not long until 4 more points were added to the M.S.P.E. score. Two more goals were scored by the R.V.C. after a few minutes of play, the score being 19-9 for the M.S.P.E. at the end of the period.

During the second half the R.V.C. picked up and within a few minutes added points to their score, though in the meantime the M.S.P.E. had scored another goal making the score 21-15. After two more goals had been added to the M.S.P.E. score, E. Russel scored a goal for the R.V.C. A few minutes later N. McTaggart scored for the M.S.P.E., shooting from well out in the floor. After the M.S.P.E. score totalled 31, B. Wardwell scored making the R.V.C. score 21, the score at the end of the game being 32-22, with the victory for the M.S.P.E.

Second Team

The ball was carried to the M.S.P.E. end, where Field scored a goal for team. This was followed by one for the R.V.C., scored by P. Murray. A double foul was made and P. Murray added another point to the score. A few seconds later Field scored 4 points. Then on a free shot awarded the M.S.P.E., another point was added to their score. P. Perry scored the next goal for R.V.C., after which 2 more were scored by the M.S.P.E.

The play saw-sawed between the teams for the rest of the period, the M.S.P.E.'s combination proving very formidable and Field's shooting outstanding. The whistle sounded, leaving the score at 17-9 for the M.S.P.E.

The second period started off with a rush, goals being scored by both sides. In a few minutes this score

stood at 18-13 for the M.S.P.E. Smith added the next six points to the Physical Ed's score with 2 minutes left the game grew exciting. Another goal was scored by the R.V.C., followed by one for the M.S.P.E. and finally a foul was made and P. Murray scored one more point for the R.V.C. just as the whistle was blown, leaving the score at 26-16 in favour of the M.S.P.E.

Line-up:

M.S.P.E. I R.V.C. I

Centre

D. Russel C. Fraser

Perry R. Dunton

Forwards

H. Tatlow E. Russel

N. McTaggart B. Wardwell

Guards

Z. Slack E. Dunton

Subs.

Roy, McCordick, and Keen.

M.S.P.E. II R.V.C. II

Centre

Godfrey L. Robertson

Copland K. Runnells

Forwards

Smith P. Murray

Field P. Perry

Guards

Anglin I. Allan

Plumtree G. Cameron

Referees—Miss Cartwright, Miss Wain.

Babe—Jones has a horse which he calls "Imagination."

Ruth—How come?

Babe—The darn thing runs away with him.

—Punch Bowl.

"My god fellow, how do you happen to be lying in the gutter?"

"Sall ri' brother, I jus' shaw two lampposts and leaned against the wrong one."

—Witt.

MANDOLIN CLUB AT UNION JAZZ TEA

Demonstration of Popularity for Jazz Tea

Gathered in the Union Cafeteria yesterday afternoon between five and six were many devotees and zealous of the highly popular Jazz Tea. The Mandolin Orchestra were the masters of the ceremony and supplied the enthusiastic gathering with melodious strains. It was evidenced that the tea had incited considerable cheer and pleasure amongst those present.

There was notably a poor representation of the lower classes at the tea and it is hoped that they will in the future realize that these events are for the convenience and gratification of all students.

A great deal of credit is due to the members of the orchestra who had willingly rendered their services. They were:

Pianist—J. Archibald.

Saxophone—B. Burling, R. Sampson.

Harp—Logan, Sharpels, Branscourt, Berridge.

Trombone—Rendler.

Many a school girl's complexion is bad taste.

The latest book ending: "And she lived flappily ever after."

"SPACETIME" DIMENSIONS DEALT WITH

(Continued from Page One)

assume a tremendous boundary pressure. This idea is untenable.

The lecturer then showed the spacetime equation due to de Sitter, which he termed "a courageous step towards the solution of all problems," gave results which avoided the difficulties arising in the Einstein Cosmological equations.

The remarkable result of de Sitter's Spacetime equation is, however, that while the laws of motion, etc. are practically Newtonian for distances terrestrial or even planetary, they bring in huge corrections for distances of stellar dimensions.

Thus the path of a free moving body regarded on a stellar distance scale—or even more so, on a "galaxy-distance" scale deviates considerably from the straight line of the body is not uniform.

Since the nebulae visible through a large telescope are at very great distances from the Solar System, the effects of these corrections become so large that their actual observation is quite possible. For instance the shift of the hydrogen line (H alpha) in the spectrum of a distant nebula amounts to four thousand times the shift predicted by the Einstein Cosmological equation for the Solar Spectrum.

The lecturer will today give the actually observed facts regarding the velocities of distant stars and nebulae.
